

Why Choose Cleaning Pros Plus, LLC

Hood cleaning that holds up on inspection day, with a record that proves it.

When a fire marshal, an insurance adjuster or a health inspector looks at your kitchen, they ask the same thing: can you show it? We clean to NFPA 96 and put the proof in your hands.

1 Credentials You Can Look Up

Cleaning Pros Plus, LLC is an IKECA member, Membership #76716495. Our founder, Arthur Haggerty, holds the Certified Exhaust System Inspector (CESI) credential, #200771, and the Certified Exhaust Cleaning Specialist (CECS) credential, #200452. Our crew are PECT Designated Technicians.

Ask any hood cleaner for their numbers. We print ours.

2 Cleaned to NFPA 96, With Due Care and Best Practices

Every hood cleaning follows NFPA 96. When the work is done, you receive a Report of Service with photographs, grease measurements in microns and findings, ready for the day someone asks.

3 All Five Fire Systems, Not Just the Hood

Our Fire-5 Tag Verification checks the service tag on your kitchen exhaust, suppression, sprinklers, fire alarm and portable extinguishers.

A missing or expired service tag is the first thing a fire marshal checks, and the easiest violation to avoid.

4 Your Insurance Policy, Reviewed

Every Fire-5 Tag Verification includes a review of your property insurance and food spoilage policies, and shows where your fire safety operations stand against the Protective Safeguards Endorsement (PSE) requirements in your property policy. A PSE ties your coverage to keeping specific fire protection systems maintained. We read your policy so you know which ones.

5 Due Dates Watched for You

Free automatic monitoring: the system monitors all of your service due dates, and you are alerted before they are due.

6 Records That Stand on Their Own

Photographs, measurements, findings and service dates are kept together, so the answer to "can you show it?" is one document, not a search.

Serving the Central Valley, the Bay Area and Northern California

Five Questions to Ask Any Hood Cleaner

Use these with every vendor. Here is how we answer.

1 What is your IKECA membership ID, and can I look it up?

IKECA Membership #76716495. Our founder's CESI credential is #200771 and CECS credential is #200452.

2 Who will be in my kitchen and on my roof, and what is their designation?

PECT Designated Technicians.

3 What will I have in my hands when the work is done?

A Report of Service with photographs, grease measurements in microns and findings.

4 Do you verify the service tags on my suppression, sprinkler, alarm and extinguisher systems?

Yes. That is the Fire-5 Tag Verification, free.

5 Who tells me when my next service is due?

We do. Automatic monitoring alerts you before each due date.

About Arthur Haggerty

Arthur Haggerty is the founder of Cleaning Pros Plus, LLC and its family of companies: EvidLY, HoodOps and Stovio Advisors. He is an IKECA member and holds the Certified Exhaust System Inspector credential (CESI #200771) and the Certified Exhaust Cleaning Specialist credential (CECS #200452), and has been retained as an expert witness in an NFPA 96 fire case. Before commercial kitchen exhaust, he spent 25 years in information technology, including ten years in IT audit and compliance and roles with Cisco, Deloitte and Dell, and consulted for Fortune 100 companies. He holds an M.S. in Information Technology and is a ten-year U.S. Air Force veteran.

Start With a Free Fire-5 Tag Verification

We verify the service tag on all five fire systems at no cost: kitchen exhaust, suppression, sprinklers, fire alarm and portable extinguishers. You see exactly where you stand before you commit to anything.
